

THE BEST LOCKING SYSTEM
FOR YOUR BUSINESS

KleverKey is an online locking system that enables device- and location-independent management via the powerful KleverKey Cloud software:

- **Everything in real time** You always have a full overview and transparency of your system
- **More security** Grant and revoke permissions with immediate effect. Key losses no longer represent a security risk
- **Simple and time-saving** With the cloud management software and the open cloud API, processes are automated and optimized. Digital keys are issued in no time at all
- **Guest access via link** Thanks to the online architecture, guests can be granted access via a link - without installing an app or creating an account
- **Fail-safe** Locks can also be opened with a card or app in the event of a power or internet failure
- **Flexible** Users open via card, transponder, App or link
- **Suitable for self-installation** Your digital locking system is assembled directly with us and installed by yourself. This reduces setup costs by up to 50%
